## *What Leaders Are Saying*

"This app is in women's voices, and it's multicultural! Women gravitate towards those who sound like them. Students are so busy, and the fact that they can just listen to it while they're walking to class is beautiful. When we do Bible studies most say, "Oh, I don't have time." With her.BIBLE, they really saw the importance and they made it a priority." *Amanda, Bridges International, NYC*

"Latisha listened and was struck silent. It was like listening to an aunt or grandma read her Scripture. What an amazing gift we give our sisters to experience God's word in their heart-dialect." *Melody, NBS2GO Bible Study Leader*

"When you've been hurt by a man, it's so hard to envision a good Father. So, to hear the Word of God spoken in a woman's voice makes the Bible more palatable." *Katie, Director of Pure Hope*
